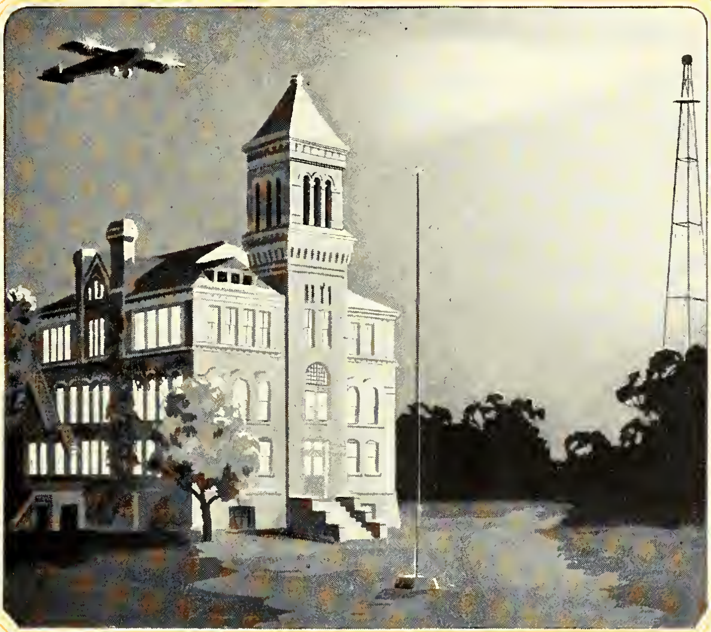
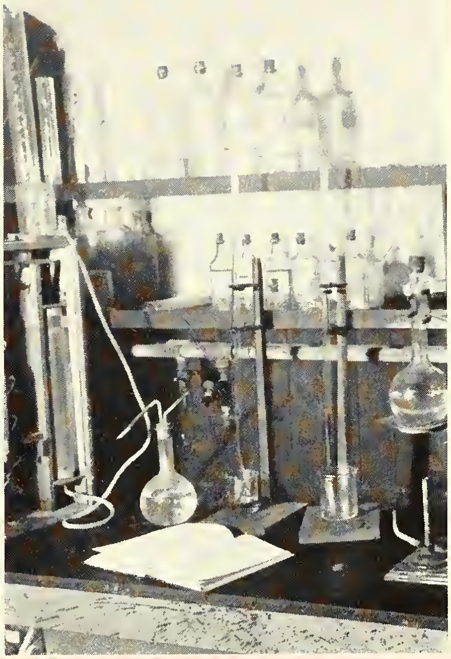
THE MODULUS
1930



Published by
THE SENIOR CLASS
OF
TRI-STATE COLLEGE,
ANGOLA, INDIANA

Foreword

Time dims the fondest of memories in its unceasing flight. May this 1930 Modulus make the memories and sincere friendships of our college days everlasting.

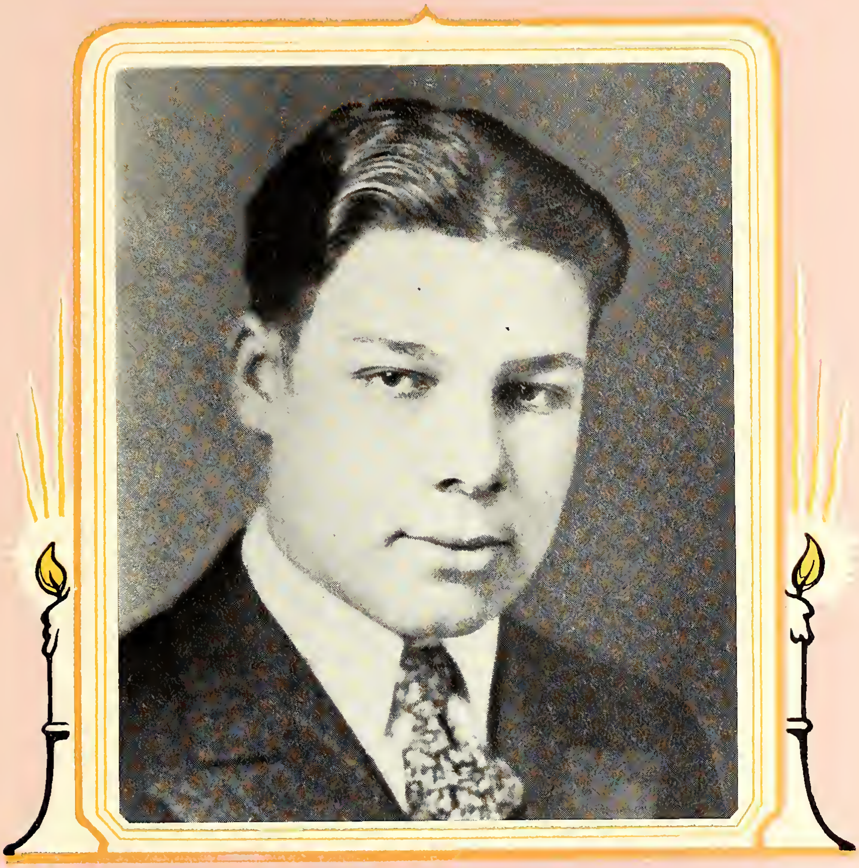


Dedication

To our Mothers and Fathers, whose unselfish thoughts and sacrifices have made our education possible.

IN MEMORIAM

Richard M. Smith, born July 29, 1911, died Nov. 28, 1929. He graduated from the McKinley high school in Canton, Ohio. Richard became a member of the student body at our college in the fall of 1929, when he enrolled in the Aeronautical division. His presence is truly missed by his classmates and friends.



IN MEMORIAM

Park Elden Kissaberth, born May 25, 1909, died July 1, 1929, at the age of twenty. His home was in Bascom, Ohio. He attended Fostoria High School and graduated there. Park became a member of the Beta Phi Sigma fraternity in March, 1928, and was a brother good and true. Nobly living, he died in his youth when life was sweetest. In our hearts we carry the tenderest memories of a fellow student who has left our midst.

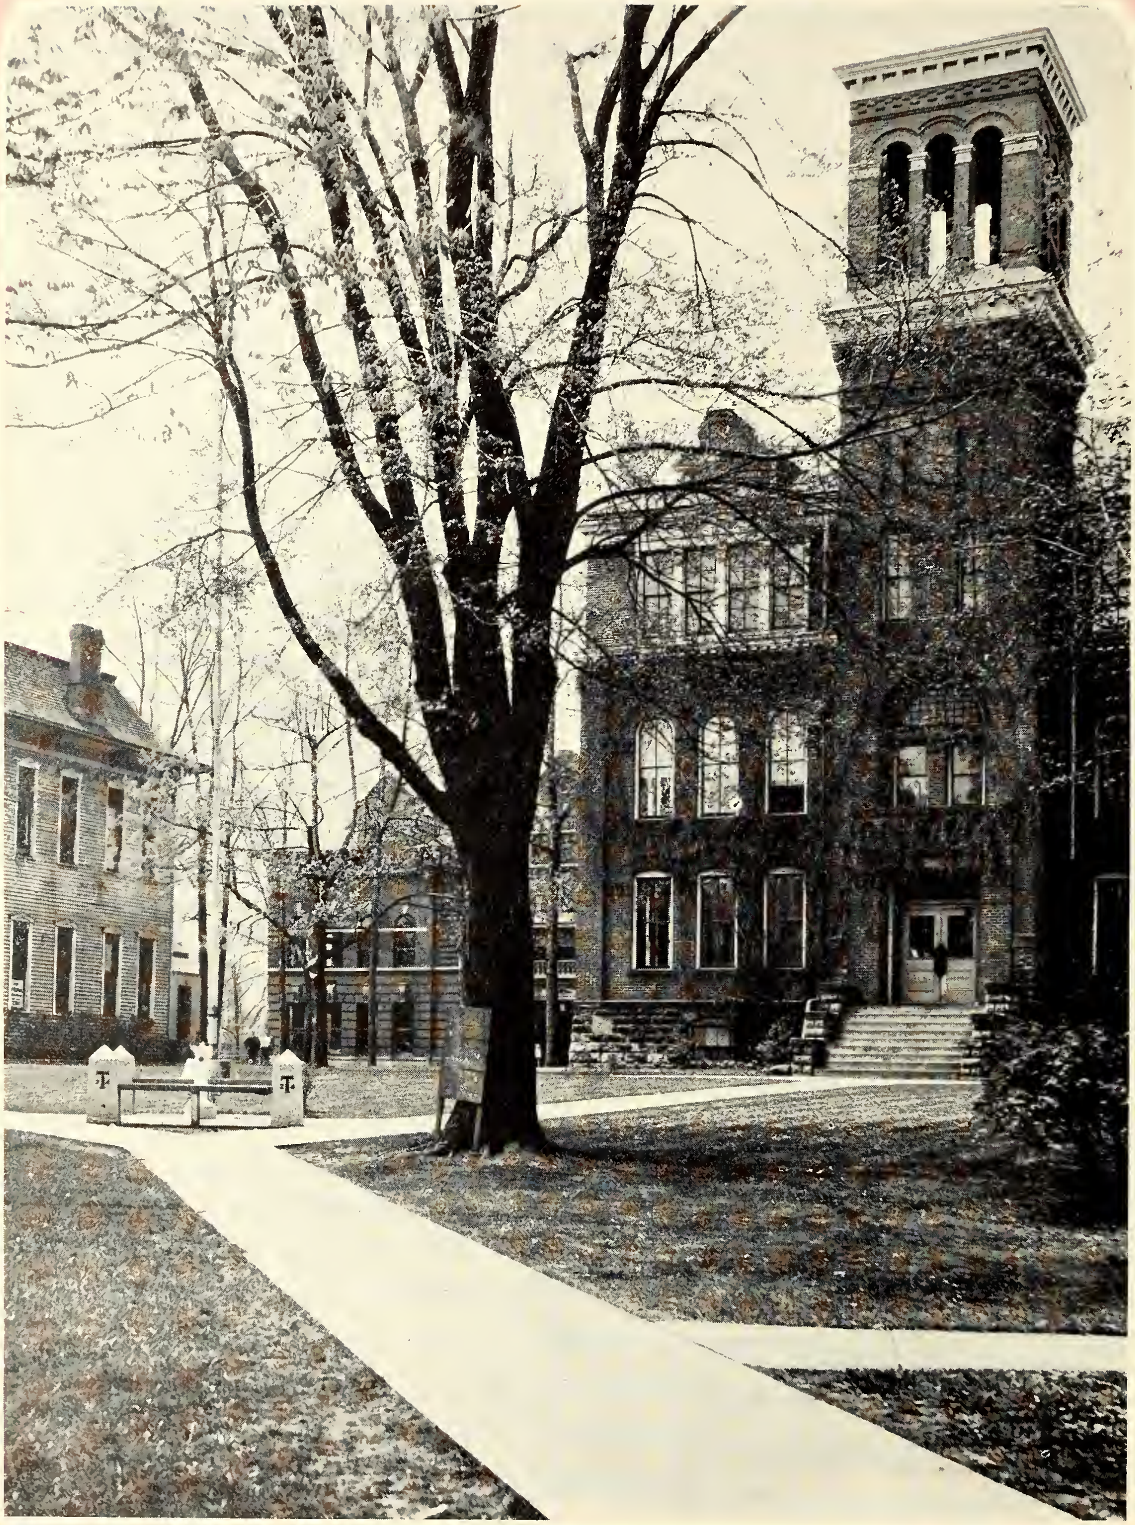
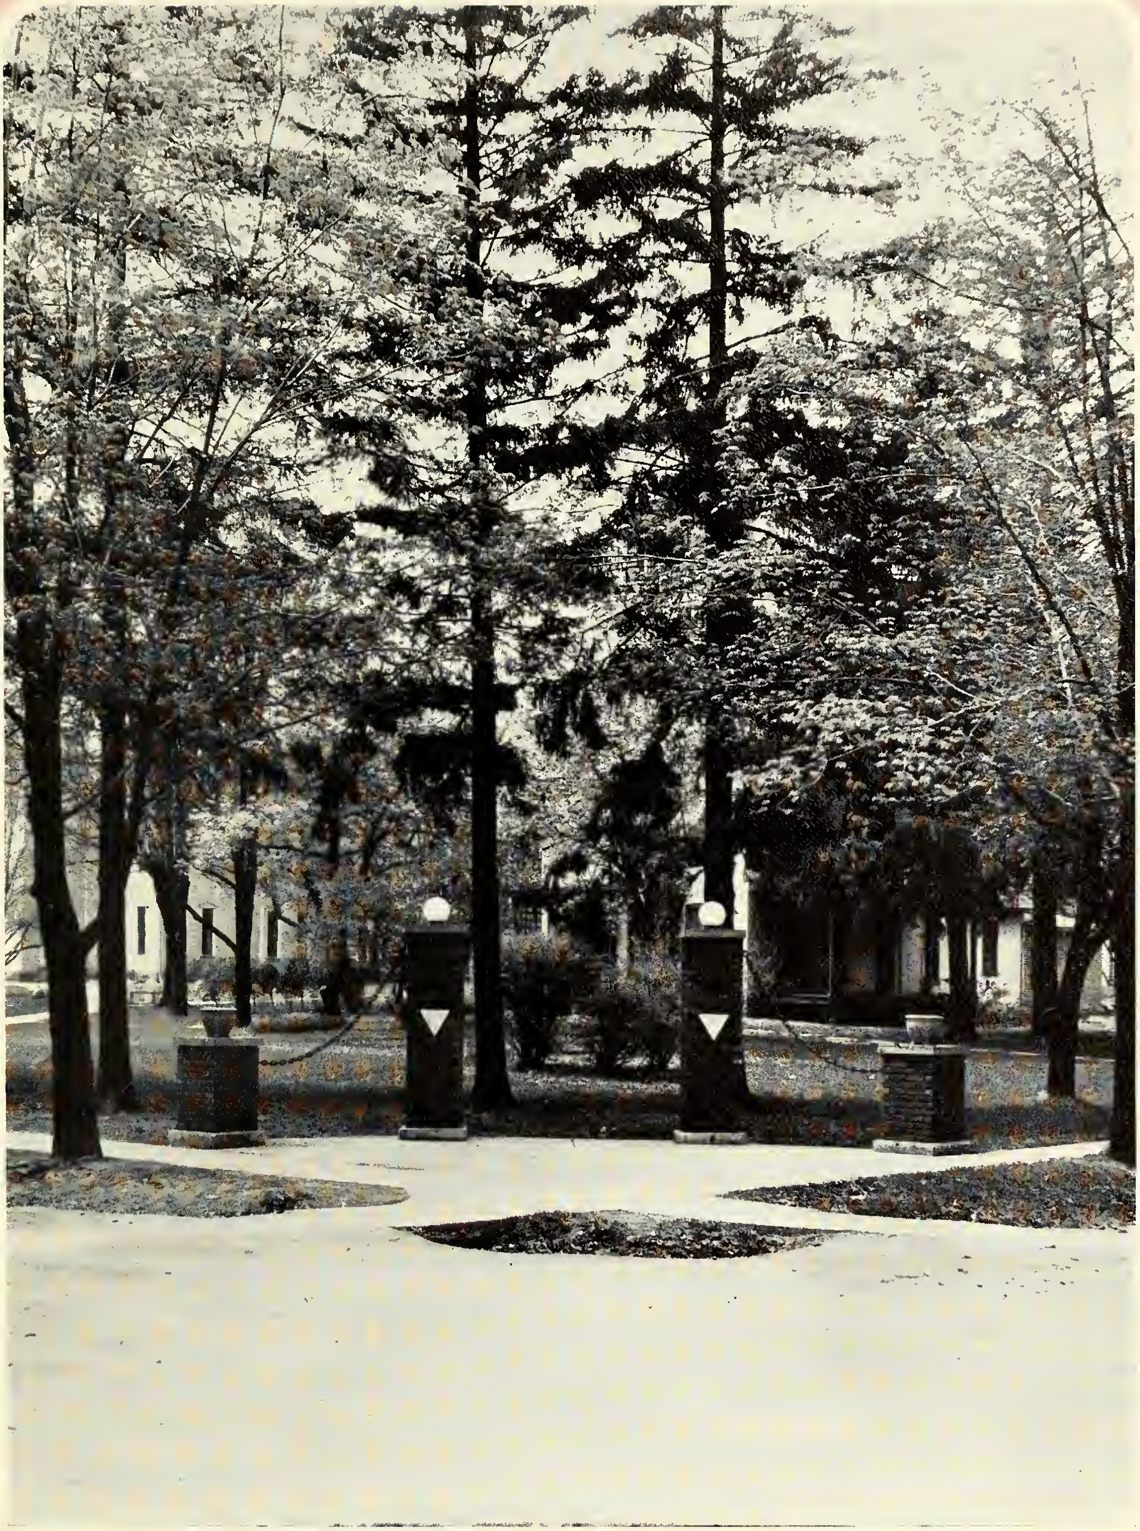
Administration Building

No nobler shrine shall greet the whitening dawn,
Through time with brighter glory to endure. —FISHER.



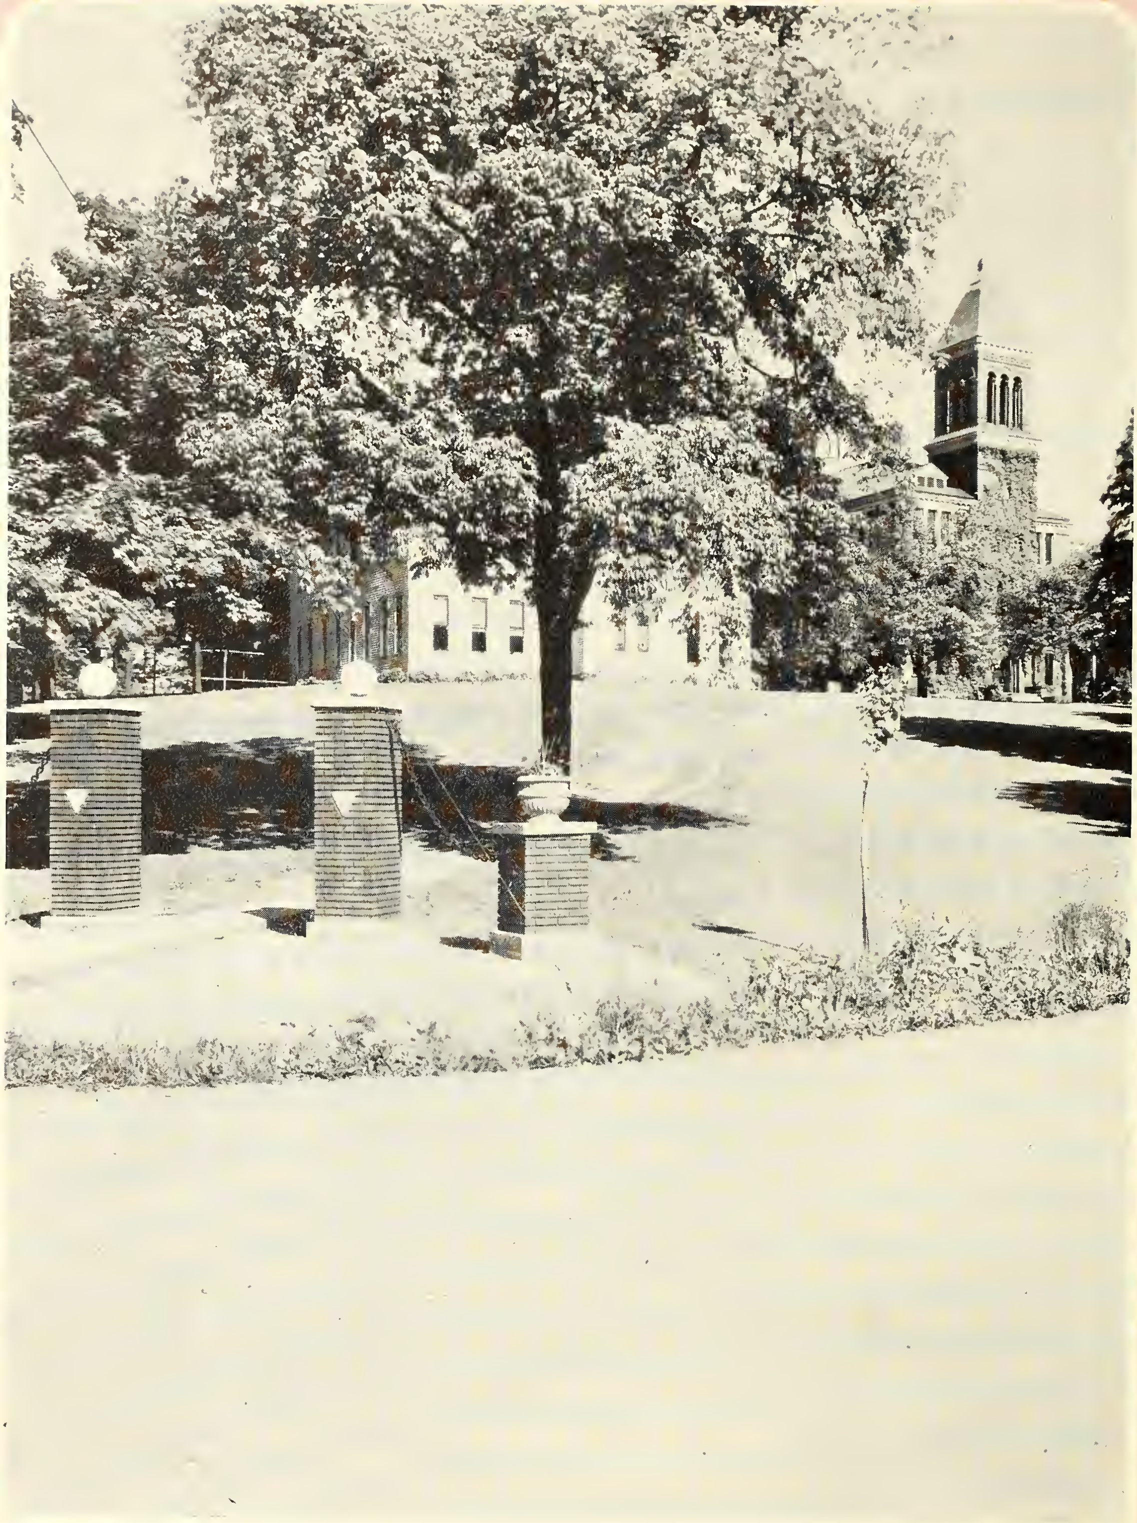
Campus Scene

One purpose, one harmonious spirit reigns,
To win for life all joy and common good. —Fisher.



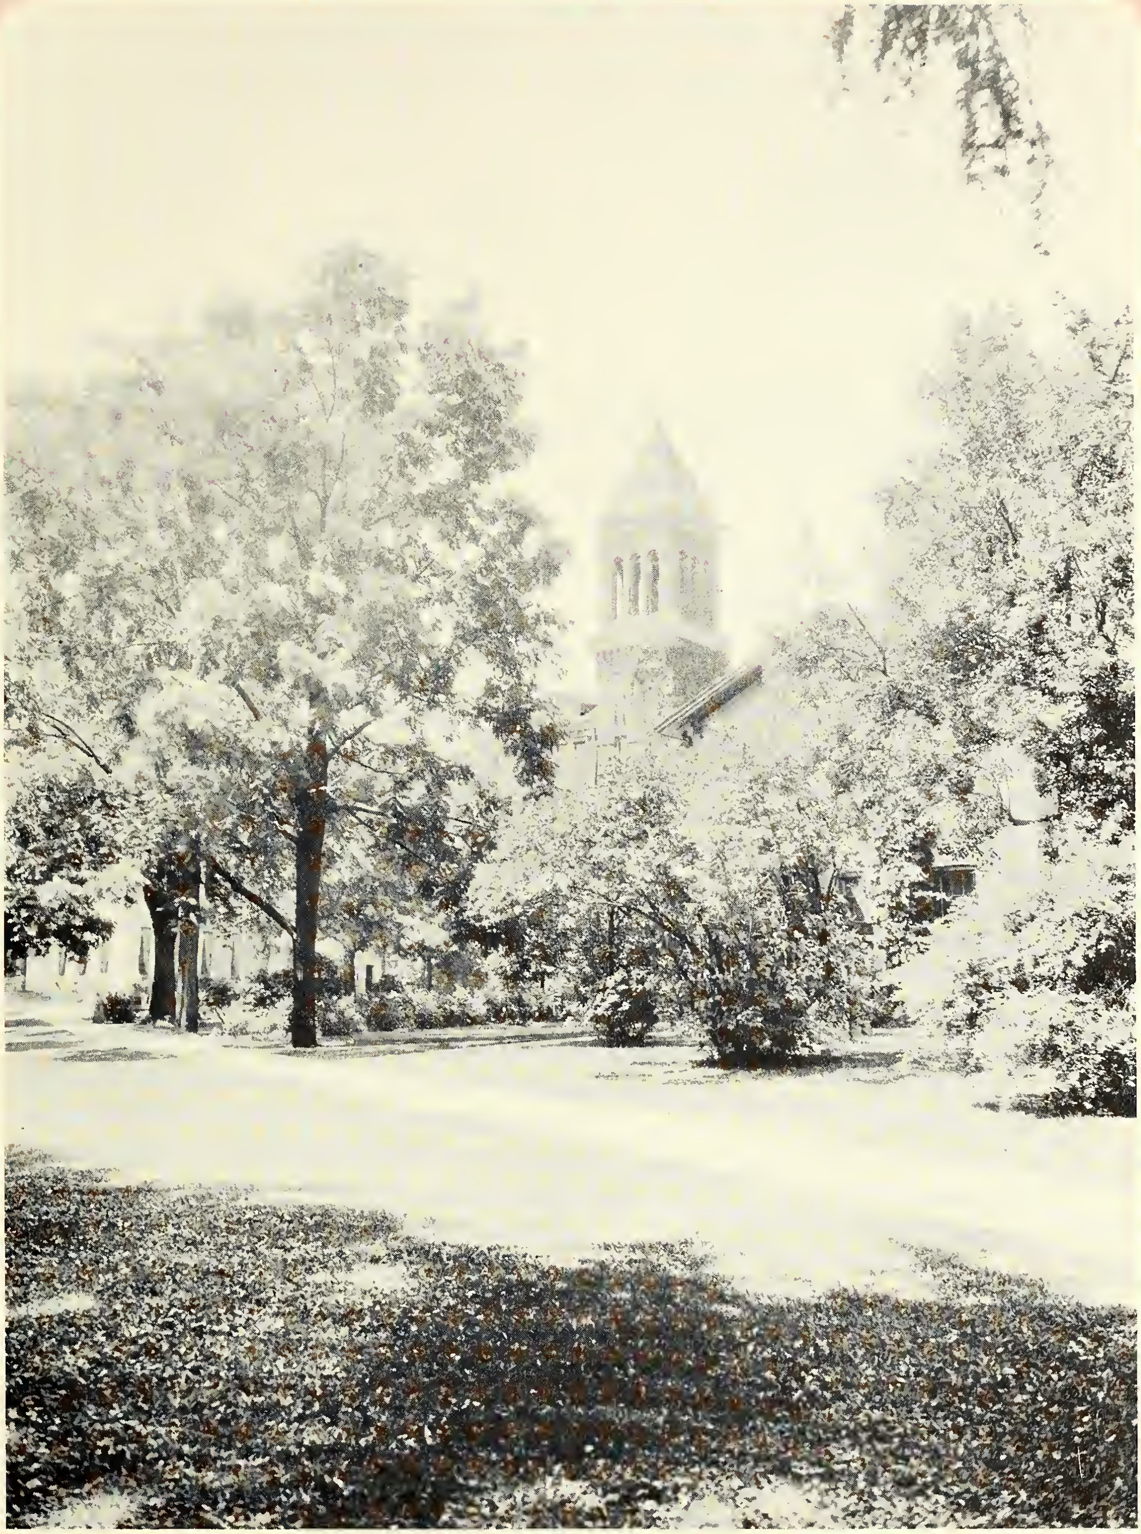
Northeast Entrance to Campus

And see that ye build it stately,
In pillar and niche and gate. —RILEY.



Southeast Gateway

. . . *We welcome through the gateway*
Our . . . old friends and the new. —UNKNOWN.



Campus in Summer

Where beauty pure of art and nature rare,
With strifeless effort doth all being bless. —FISHER.

Campus in Winter

How grand the artist that paints this scene,
With snow white veil spread everywhere. —Anon.

Fox Lake

And slow the great white clouds fade
Where sky pools meet the earthy lakes of Indiana.—Anon.

A Shady Path

As bursts some scene of beauty bright
Of autumn shades and hues. —FISHER.

Charles C. Sherrar

Individuality

Every individual, business, profession, industry, organization, city, state or country has certain attributes or individualities which are decidedly characteristic, and which shows a marked distinction from all others of the same class. Due to this fact a multiplicity of ideas and ideals and human effort have produced an ever increasing accumulation of improved methods for advancement and betterment of social, business and living conditions.

Because of these individualities, unprecedented progress has been made, to the end that methods of living today are so far in advance of past generations and centuries that we are actually amazed at the results of human progress.

An idea or ideal of one individual induces like thoughts and analyses on the part of others who are touched by similar environments, with the ultimate result that, today, the people of the world are rapidly coming to be known as one great human family.

In a small or more circumscribed way it is interesting to note and study the individuality and selected environment of the students of Tri-State College.

The college itself has a distinctive individuality, there being no other school of like character in the country or perhaps in the world, and because of this fact many naturally talented young people are attracted to us. These splendid people, coming from all parts of the Earth, have their own individualities and yet their ideas and ideals are influenced by the unique characteristics of Tri-State College, hence their outlook on a future life of real service and usefulness is greatly augmented.

We hope and we believe, that the individuality of Tri-State College has been the instrument of aiding many worthy young people to become potent factors in the sum total of human progress. We believe this because we find our graduates identified with a great variety of enterprises and organizations in almost every country of the world.

C. C. Sherrard,
President Tri-State College.

Burton Handy, A.B.
Secretary-Treasurer
Mathematics

Burton Handy.

A man's real value to humanity is not measured in terms of physical values nor in terms of personal power nor mental capacity, but rather it is measured in terms of big heartedness, thoughtfulness, service, understanding, and sympathy. It is measured by his willingness to help carry the burdens of others; by that quality within him that inspires in others a feeling of trust and confidence. A man who is a friend of humanity, whom men believe, whom women honor, and whom little children implicitly trust—though he be poor in worldly goods, has a value beyond the power of computation; for out of the bigness of his soul he has made a contribution to life and character that can never be measured.

It was said long ago that "men labor and other men enter into the results of their labor". How true this is whether it be in the realm of finance, morality or education. Every graduate listed in this book builds upon the achievements of men who have gone before. Parents, friends and strangers have contributed to their success in varying degress. How thankful we should be for the aid thus received and how eagerly should we strive to embrace the opportunity to so order our efforts that we may in like manner contribute something of value to those who come after us. No man can set up a more worth while goal for himself or accomplish a more worth while task during a lifetime of service.

Walfred Lindstrom, A.B.
Dean of the School of Commerce
Finance

Engineering is influencing the lives of all civilized nations. The engineer has a great responsibility. A good engineer should have an upright character, should be accurate, truthful, sober and discreet. He must have command of his temper, have firmness and courage that will repel solicitation and attempts at intimidations. He must be energetic, and take an interest and have experience in his work. His dealings with men must be fair and impartial as a judge on a bench. He must be of inflexible integrity, and should not go ahead, until he knows he is right.

The Engineer who combines these qualities is beyond price, and his value cannot be estimated by dollars.

The Builders

All are architects of Fate,
Working in these walls of Time;
Some with massive deeds and great,
Some with ornaments of rhyme.

Nothing useless is, or low;
Each thing in its place is best;
And what seems but idle show
Strengthens and supports the rest.

For the structures that we raise,
Time is with materials filled;
Our to-days and yesterdays
Are the blocks with which we build.

Truly shape and fashion these;
Leave no yawning gaps between;
Think not, because no man sees,
Such things will remain unseen.

In the elder days of Art,
Builders wrought with greatest care
Each minute and unseen part;
For the gods see everywhere.

Let us do our work as well,
Both the unseen and the seen;
Make the house, where gods may dwell,
Beautiful, entire, and clean.

Else our lives are incomplete,
Standing in these walls of Time,
Broken stairways, where the feet
Stumble as they seek to climb.

Build to-day, then, strong and sure,
With a firm and ample base;
And ascending and secure
Shall to-morrow find its place.

Thus alone can we attain
To those turrets, where the eye
Sees the world as one vast plain,
And one boundless reach of sky.

—H. W. LONGFELLOW.

Seniors

Senior Class '30

Such an important occasion as the graduation of a class demands the combined efforts of those who are to participate in the affair. This makes necessary the definite organization of the Senior Class and the appointment of a number of committees to take charge of the work. A few weeks ago this task was undertaken and successfully accomplished by Professor Handy, who is one of the faculty advisors.

The following persons were elected as officers: Robt. B. Bonar, president; John Magill, vice-president; Catherine Dunn, secretary, and Theo. Streeter, treasurer. These persons immediately took charge of affairs and appointed committees to dispatch minor details.

The memorial committee has had a rather difficult task in deciding the most appropriate token, which should be left by the Class. At the present time plans have been made to install an electrical clock system in the College. This improvement would mean something to the College and should serve as an excellent memorial for this class.

The program committee is endeavoring to decide upon an appropriate form of commencement invitation and a program for the Class. These plans have progressed rapidly and a definite schedule of events will soon be issued.

The dance and entertainment committes are making arrangements for a variety of entertainments. This work is proceeding nicely, while the minor committees attend to their duties.

Professor Parrott was chosen as Class Advisor. She gladly accepted the task and expressed her willingness to aid the graduating class in every way possible.

At present no complete program has been outlined; therefore, it is impossible to give the exact details of any of the events. However, the Commencement week will extend from June 1 to June 6. Baccalaureate Services will be held on Sunday, June 1; while the Commencement on June 6 will bring a close to the affairs.

Meanwhile the Seniors await patiently any events or receptions which may await them. They assume an aristocratic air and don a cane and high hat. Such are the Seniors of 1930.

The Seniors

Graduation time is here
For the nineteen thirty class;
They have finished all their studies
And are leaving in a mass.
Some go North and some go South,
Others East and some go West . . . .
While the thought that's with each student
Is that his direction's best.
They have built here a foundation
That will carry them through life;
They have studied, planned and worked
Through turmoil, stress and strife.
Now that they've achieved their goal,
They will seek better things,
They'll begin their useful work
For the glory that it brings.
There is a warm spot in each heart
For their Alma Mater dear,
For the quaint and rustic buildings
That can only be found here.
There's pride in every human breast
That will stick with them 'til late,
For the finer of the friendships
They have made at dear Tri-State
There is beauty in the campus,
There is heaven in the trees;
There is fellowship and love
Cradled with the summer's breeze.
There is honor and respect
Wrapped in each human thought,
For the many different comrades
That college life has brought.
There is memory of fair play
For the finest Faculty,
That ever guided any school
On the course of destiny.
The Seniors in their leaving
Wish the best of all good cheer,
To all the underclassmen
For a good and happy year.

AL. V. RUBEI *New York, N. Y.*

B.S. in E.E.

Great is journalism. Is not every able editor a ruler of the world, being the persuader of it.

FREDERICK K. CRISSMAN

B.S. in E.E.

"His knowledge is a fountain both of love and the principles of human liberty"

Our groping's done
The prize is won
The search for truth goes on.
The light that sheds its brilliant glow
Has guided us, that we may know
The route; we know that naught
Shall stop our onward, upward trend,
No obstacle our progress end.
The breath of time has fanned our cheek,
The knowledge which we came to seek,
The words that we were taught to speak,
Shall be to us as virgin gold,
Our own to use, to have, to hold.
No stars above could glow more bright
No beacon shed more precious light
Than that which shines on all creation
The jeweled Lamp of Education.

BOB BIANCHI

Under Classmen

Press On

Press on! Surmount the rocky steps,
Climb boldly o'er the torrent's arch;
He fails alone who feebly creeps,
He wins who dares the hero's march.
Be thou a hero! Let thy might
Tramp on eternal snows its way,
And through the ebon walls of night
Hew down a passage unto day.

Press On! If once and twice thy feet
Slip back and stumble, harder try;
From him who never dreads to meet
Danger and death they're sure to fly.
To coward ranks the bullet speeds,
While on their breasts who never quail,
Gleams, guardian of chivalric deeds,
Bright courage like a coat of mail.

Press on! If fortune play thee false
Today, tomorrow she'll be true;
Whom now she sinks she now exalts,
Taking old gifts and granting new,
The wisdom of the present hour
Makes up the follies past and gone,
To weakness strength succeeds, and power
From frailty springs! Press on, press on!

PARK BENJAMIN.

But once I passed this way,
And then—and then, the silent door
Swings on its hinges—
Opens . . . Closes—
And no more
I pass this way.
So while I may
With all my might
I will assay
Sweet comfort and delight
To all I meet upon the pilgrim way,
For no man travels twice
The great highway
That climbs through darkness up to light,
Through night
To day.

ORGANIZATIONS

The Sigma Alpha Gamma Sorority

Sigma Alpha Gamma

"WHY do you suppose sororities exist?" We believe it is a satisfaction of a longing which most of us have for a unity of purpose, for fellowship genuine friendship, and the feeling that someone needs us, for the interchange of ideas, and, primarily, as a result of the gregarious instinct peculiar to the majority of individuals. Then it does satisfy a need, does it not?

Beta chapter of Sigma Alpha Gamma Sorority was organized at Tri-State College in November, 1926, the second chapter of a national sorority for commerce students, with seven charter members, one of whom is now an active member. A few new members were taken in and several went inactive during the two years that followed.

During the fall term of 1929, through the efforts of the remaining active members, who were determined that our sorority should once again become active in school affairs, a series of parties was held, the first at the home of Helen Schinbeckler. It was in the form of a bunco party, the second in the form of a "kid" party held at the home of Lucile Ensley. A pledge meeting was held December 16, 1929, in which nine pledges were given their work.

On Saturday, January 11, 1930, Hulda Olsen (Grand President), Helen Ditzler, Dorothy Collins, Consuelo Cain and Margaret Ehrmann assisted in the initiation of the nine pledges into Beta chapter. A lovely banquet was served in the dining-room of the Hotel Hendry. The sorority colors were used in the decorative scheme and huge bowls of violets were placed at intervals along the table. Place cards and programs in blue and silver marked the place of each guest and each was given a dainty crepe-de-chine handkerchief as a favor.

Margaret Allen served as toastmistress. Toasts were given Lucile Covell, Hulda Olsen and Edna Lee, who gave the pledge response.

Beta chapter not so long ago was in danger of becoming an inactive chapter. Now she is on her feet again and well on her way to success, and let us all do our parts to keep it so.

The officers for 1930 are: Mrs. Adeline Croning, president; Edna Lee, vice-president; Edith Lemmon, secretary; Catherine Dunn, treasurer; Loretta Sanders, corresponding secretary; Louise Gabrel, sergeant-at-arms; Bertha Platt, social chairman; Lucile Ensley, news reporter; Margaret Allen, *Shield* reporter.

We shall love you not when fortune chains are around thee,
Not when hopes the brightest shine,
Not when pleasure's trains surround thee,
And their beaming smiles are thine.

Not when earth is full of brightness,
Not when skies the fairest prove,
Not when life is full of lightness,
Will we give our warmest love.

But when your cheeks have lost their brightness,
And your eyes their lovely hue.
When your hearts have lost their lightness,
Then we will fondly cling to you.

When the beams of hope are vanished,
And the chains of fortune lost,
And the trains of pleasure banished,
Then it is we will love you most.

Sigma Alpha Gamma.

Fraternities

Phi Lambda Tau

Sponsored and helped by the inspiration and advice of the I. O. O. F. Lodge, the Phi Lambda Tau Fraternity was founded in Angola on the evening of March 31, 1924.

Like all normal, worth-while things the beginning was small, but the growth has been steady because the foundations were right.

The foundations of any fraternity are its ideals. These must be worth-while. Disintegration can set in only because of lack of loyalty; because of failure of the members to follow out the ideals laid down by the fraternity.

Understanding: An understanding, an evaluation of the worth-while things of life, and reflection upon those things, brought forth the ideals of Phi Lambda Tau.

First, Knowledge—and a proper respect for the statement that "the purpose of education is to make all relations profitable." Fear is one of the greatest foes to progress. Ignorance is the cause of fear; therefore, Knowledge is truly the Light to Progress.

But that is not enough. Man is a social animal. The fraternity can by "steadfastness in friendship" and development of brotherly love, help to satisfy that very natural instinct.

Finally, the fraternity must justify itself in the eyes of the outside world. Phi Lambda Tau seeks urbanity in conduct that is above reproach and courtesy in expression to all with whom its members come in contact.

Knowledge—Scholarship—is our first aim.

A willing assumption of duty in outside activity as witnessed by the active part our members have in the Engineering Society, the Commerce Club, the Modulus Staff, and the Integral Staff.

And, finally, for our fellowship, six parties, a Spring Dance, and several smokers are held each year.

No organization functions one hundred percent. The disgrace lies in being satisfied with whatever our accomplishments.

Phi Lambda Tau pledges new allegiance to her ideals, and a greater courage in carrying them out in the life of Tri-State College and the town of Angola.

Sigma Mu Sigma

ALPHA CHAPTER

Men of Azureor, all are we
Of Sigma Mu Sigma Fraternity.
Bound by ties of lasting faith
In fellowship of Masonic state.

Men of law ordained are we
Of Sigma Mu Sigma Fraternity.
And where'er our paths shall wend,
Always shall our teachings blend.

College Masons are we
Of Sigma Mu Sigma Fraternity.
Brothers of an ancient craft
Proud are we to be.

Let voices ring in harmony
To her name and memory.
Ever shall you be to me
Dear *Sigma Mu Sigma* Fraternity.

OLPHA CHAPTER, Sigma Mu Sigma, was founded at Tri-State College on Good Friday, March 25, 1921, by three Masonic students, Bros. Claude R. Brown, Charles W. Knapp and Harold D. VanVranken. Sigma Mu Sigma is strictly a Masonic organization, only Master Masons being admitted to membership. At the present time we have at this chapter 170 alumni, 19 active members and 9 pledges.

During the month of January, 1928, a meeting of the Interfraternity Council was held in New York City, at which time Sigma Mu Sigma petitioned for recognition. The petition was approved at this time. Sigma Mu Sigma is now a senior member, enjoying all the rights and privileges of a National Social Fraternity.

From the humble beginning in 1921 to the present time the fraternity has experienced a rapid growth; the work of our founders has not been in vain. At this time we have chapters located at the University of Oklahoma, Oklahoma A. and M. College, George Washington University, University of Illinois, Purdue University, and Michigan State Teachers' College.

Sigma Mu Sigma is founded on the teachings of Masonry, laying stress on scholarship and character. All of our members are of a mature age and realize the importance of improving *intellect* and building *character.*

''We realize the blind force of the people is a force that must be economized, and also managed, as the blind force of steam, lifting the ponderous iron arms and turning the large wheels, is made to bore and rifle the cannon and to weave the most delicate lace. It must be regulated by Intellect. Intellect is to the people and the people's Force what the slender needle of the compass is to the ship—its soul, always counseling the huge mass of wood and iron, and always pointing to the north.''—ALBERT PIKE, Grand Commander, 33°.

The foundation for strong character is laid in the home. When college days arrive something must replace this home atmosphere so that the growth might continue. Thus we attempt, through Sigma Mu Sigma, to replace this atmosphere by our association and fellowship.

Beta Phi Theta

During the Great War a number of young men at the student army training camp located at Milwaukee State Normal School saw the need of a new fraternal organization. The older organizations for various reasons did not satisfy the new conditions brought on by the war. Therefore, in October, 1917, a group of these young men organized the Beta Phi Theta Fraternity.

Beta Phi Theta continued at Milwaukee State Normal, now the Milwaukee State Teachers' College, as a local organization until 1925, when it was decided to expand. During that year Beta chapter was established at Marquette University and Gamma at the University of Wisconsin. In 1926 Omicron Sigma chapter was installed at Bradley Polytechnic Institute and in 1929 Tri-State College became the home of Delta chapter.

Delta Chapter today occupies the paradoxical position of being one of the newest and at the same time one of the oldest organizations on the campus. In 1922 a group of Tri-State students banded themselves together in an organization which they called the "Four-Eleven Gang." Their association was so successful socially in promoting good fellowship and dispelling lonesomeness and so beneficial scholastically that they decided to expand so that other students might enjoy the same advantages. As a result of this the Lambda Phi Epsilon Fraternity was organized.

As the organization grew and prospered Lambda Phi Epsilon sought for ways to be of additional benefit to its members. Recognizing that one of the greatest sacrifices the average student makes in obtaining an education is that of his home life, the fraternity decided to establish a college home for its members. Accordingly, during the Fall term of 1925 the first fraternity house at Tri-State College was opened.

When the College finally recognized fraternities a little over a year ago Lambda Phi Epsilon decided to broaden the scope of its activities by affiliating with a national organization. Since Beta Phi Theta had the same progressive spirit and modern ideals as the local organization, negotiations were commenced which culminated a year ago in the installation of Lambda Phi Epsilon as Delta chapter of Beta Phi Theta.

Delta chapter has always been active in beneficial collegiate and interfraternal activities. Its members are always back of the Engineering Society, the *Integral*, the MODULUS, and other College activities. In spite of our many and varied activities, however, we never lost sight of the primary reason for our being here. We strive to maintain ourselves slightly above the average in scholarship and choose our pledges with this in view.

Fraternity. May we, in looking at ourselves, find ourselves ever worthy of this eternal brotherhood to which we are pledged. May we continue to build, upon this firm foundation laid by those who have gone before us, a true and upright brotherhood of real students, real men. Let us always, in our dealings with others, so conduct ourselves that Tri-State and the Fraternity will be proud to claim us for their own.

Phi Sigma Chi

On the night of December 17, 1927, thirteen men were duly initiated and installed as the Delta Epsilon chapter of the Phi Sigma Chi Fraternity. There were many skeptics who doubted whether this new fraternity would flourish amongst what we might call too much competition. Just a year ago the fraternity celebrated its second birthday and at the time of this writing we have welcomed into our midst over one hundred and seventy men.

The path was neither smooth nor easy; on the contrary, it was exceedingly difficult. The men who founded this chapter had to sacrifice a great deal of their time and money in order to secure a firm foundation on which to build. A visit to our rooms or a talk with one of our members will convince anyone how well they did their task. Since then we have made rapid progress in the building up of the chapter. This last winter term the fraternity rooms were completely renovated and refurnished.

It is our usual custom to have a dinner dance near the end of each term. This being the main social function of the term, it is invariably a huge success.

The fraternity particularly likes to hear from its graduating members—what they are doing and what success they are having. It is always pleasing to know that a brother is making good on the job.

The pledgeship of this fraternity is really a probationary period for a prospective member. During this period his actions, character and general attitude are observed carefully. Pledging is referred to commonly as hazing and sometimes carried to an extreme. It is true that certain phases of pledging seem foolish and unnecessary, but it is necessary, not only to see if the pledge has the will power to go through and complete a job that is distasteful, but also to see that he takes it in good grace. We do not believe in unnecessarily berating a pledge nor do we believe in too long a pledgeship. To become a member of this fraternity requires hard work, as the pledge will attest, but to appreciate any of the real things in life calls for hard work.

Men who are accepted in this fraternity must be of the highest caliber—men who will give their best in order that the traditions of the fraternity shall be upheld.

Harmony is a vital essential in any form of business or social enterprise. It is our aim to promote harmony among the members, to create an atmosphere of good-will and to instill in each one the spirit of the Golden Rule. Friendship and brotherhood are the mainstays of this fraternity. To surround each member with a circle of friends whose companionship will make him a better man for it in years to come is our chief desire.

Beta Phi Sigma

The Beta Phi Sigma Fraternity came into existence September 9, 1899, at Muncie, Indiana. It was organized by a group of seven men, the pioneers of the organization which at the present boasts a membreship of well over 12,000 men. The chapters are found in every large city, comprising a network extending from coast to coast. The organization is a Greek letter fraternal and secret society and is nonacademic. It is founded upon the Christian faith; all the lessons taught are derived from that source. Admittance to the order is gained by invitation only.

During the World War eighty-seven percent of the members of this organization placed themselves in the service of our country. In the fraternal archives are found record of the Betas holding their meetings in rest billet and other places during their stay in France. The order claims to be the only one of its nature actually to have taken its ritual over seas.

The Tri-Alpha Chapter of the Beta Phi Sigma Fraternity, which is located in Angola, was organized June 7, 1922. Progress and expansion have been consistent and today the chapter is both large and powerful.

During the early stages of development the chapter was content to hold its meetings in various places. However, it soon became necessary to move to larger quarters in order to accommodate the rapidly growing number of members. This was accomplished by the purchase of what is known as the "Beta House."

The Beta House consists of spacious living- and dining-rooms on the main floor, comfortable study-rooms on the second floor and a large dormitory on the third floor. It is only right that the members should feel proud of the Beta House.

The Betas have numerous social affairs during the year. At least two house parties are given each term which offer joyous recreation to the members. The main social event is the Spring Frolic, which is held at the end of the Spring term.

The Beta Smokers have been very successful in gathering into our fold new material which will develop into future upholders of our ideals, loyalty, and spirit, to say nothing of our fine records in scholarship.

Here's to our Fraternity, Beta Phi Sigma!

Phi Delta Kappa

Early in the year of 1920 a fraternal organization known as the Delta Lambda Xi came into being. It was the first of its kind in Angola. As its purpose was to foster good fellowship, it consequently thrived, and in due course of time decided to link up with a nationally known fraternity.

The organization having decided to accept admission to the greater Phi Delta Kappa Fraternity, on March 13, 1922, was inducted and aided in the joining by the Upsilon chapter of Garrett, Indiana.

The charter members of this new Gamma Chi Chapter of Phi Delta Kappa were E. E. Bergen, Ronald Owens, W. O. Blakely, O. P. Carrol, Harcourt Sheets, Bernard Walker, F. Q. Berquist, Phillip E. Hedges, H. E. Smith, Herloth S. Ryder, O. A. Bassett, and Lyle M. McBride.

Brothers who have joined our ranks since the date of its birth are far too numerous to mention individually. However, we wish to say that they are wonderful fellows, always Phi Delts, never forgotten, and we wish them all the greatest success in life.

It is the spirit of the fraternity to contribute their services to the general welfare of the public and particularly to the community in which the chapter is located. The last contribution of a serious nature was the sponsoring of a Mississippi Flood Relief Dance, which was well attended. All funds were turned over to the authorities for use in the stricken zone.

Our Annual Spring Frolic, held in May, 1929, was by far the greatest social achievement ever credited to the chapter. There were approximately one hundred couples in attendance, many of the brothers coming several hundred miles to be with us for what has become the greatest event of the year.

The dance was held at Potawatomi Inn on the shores of beautiful Lake James. Breakfast was served, novel entertainment introduced, and well—a most enjoyable time was had by all. Congratulations poured in from all the neighboring chapters. At this time the 1930 Frolic is being arranged. It is our most sincere wish and fondest hope even to surpass our 1930 efforts.

March, 1930, set a record for our smokers, which are held each term to introduce new pledges. At this time we entertained about a hundred nonmembers, most of whom were freshmen or second-term students.

The Gamma Chi Chapter is now led by college men who have the benefit of the fraternity and the promotion of the highest scholarship at heart, who conscientiously perform their duties as officers, fostering good fellowship and fraternalism among the brothers. The active members for 1930 are: Barton Arnold, Lohman V. Blue, Ralph Bradford, Walter R. Bischoff, Lindley G. Brown, John A. Domonick, Edward Field, Donald Gaston, Ersillio R. Gianni, William J. Giustetti, William Greer, Fred E. Hardy, Clyde Irwin, Ferdinand Jacobs, Milton D. Knapp, Russel Kundaxe, Frederick M. Leiper, Alvin Lewis, James R. Loving, Arnold Newman, Howard Martindale, Alton J. McClung, Ward B. McCardel, Henry G. Otte, Oscar Parsons, John W. Reice, David W. Richardson, Cecil Robb, John S. Reid, Rufus L. Smith, Ralph Speiser, Donald Sarber, Vernon Swartz, Anthony J. Triano, DeForrest Wade, Charles Wilford.

The Filipino Club

Historically speaking, the Filipino Club of Tri-State College holds the distinction of being the second oldest society organized by students in Angola. The Phi Delta Kappa, formerly the Delta Lambda Xi, was organized in the same year as the Filipino Club, namely 1920.

The Filipino Club, although not a Greek letter fraternity, holds and promotes fraternal spirit of brotherhood, co-operation and mutual understanding among the resident and foreign students of the college. The Filipino Club was born a Christian, non-sectarian, nor too academic. The members spend their Sundays in different churches to uphold their creed to Christianity.

Among the eight fraternities that constitute the Inter-Fraternity Council of the college, the Filipino Club was one of the active workers co-operating with this newly born council. The function of this council was to promote harmonious spirit between the college and the fraternities.

Like other organizations, the Filipino Club is governed by its constitution and by-laws formulated with the requirements of Roberts' Rules of Order.

The objects of this club are:

(1) To promote the spirit of co-operation and brotherhood among the Filipino students in all institutions of learning in the United States of America.

(2) To develop their Christian character, to improve their spiritual, mental and social conditions.

(3) To propagate a concrete and accurate information regarding the Philippine conditions and ideals.

The members of this club shall consist of these classes, namely:

Resident: Any Filipino students of good moral character residing in Steuben County.

Associates: Any Filipino student leaving college on the reason of graduation shall be considered an associate, providing he still desires to be so.

Honorary: Any Filipino Tri-Stater who achieves distinction in public service in arts or science shall be nominated as such.

Appreciation: The officers of the club express their sincere thanks and heartfelt appreciation to those enthusiastic members who have made this possible.

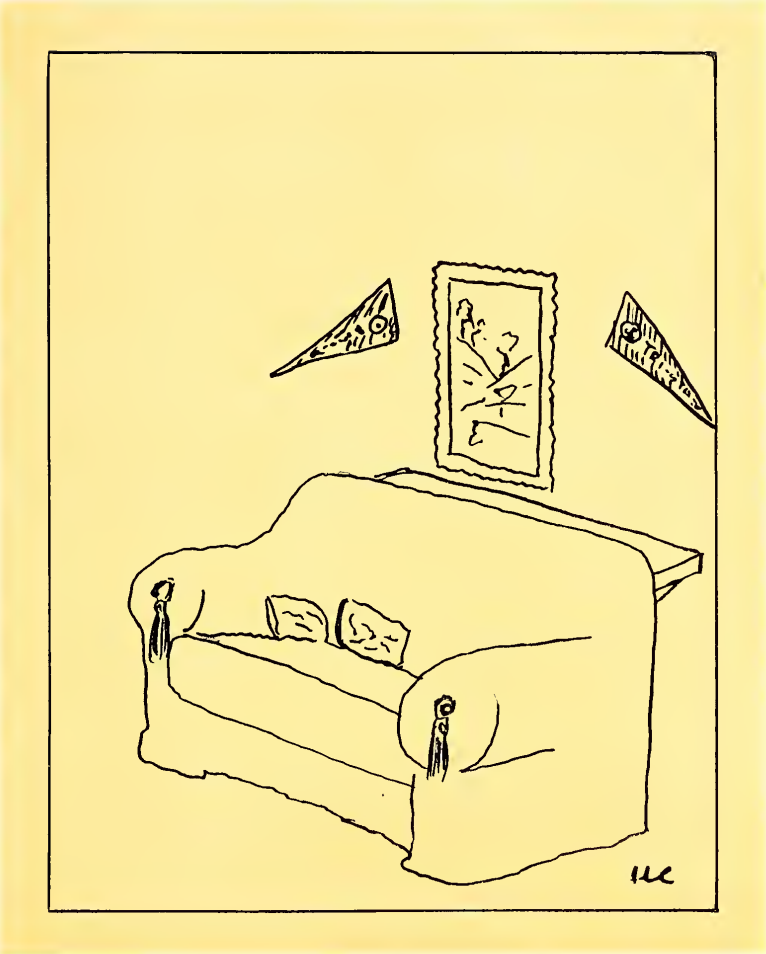
Alpha Delta Alpha

The governing body, known as the Protus Boule of Alpha Delta Alpha national collegiate fraternity, accepted and duly installed upon May 2, 1930, a chapter on the Tri-State Campus.

Phi Lambda Tau affiliated with this organization and shall be known hereafter to the fraternal world as the Eta Chapter of Alpha Delta Alpha.

Protus Proedros
H. Woito.



Clubs

The Commerce Club

In the Fall Term of 1928 you may recall that an organization came into existence and has gradually grown to a place of great importance on the campus. With the guiding hand of our dean, Mr. Walfred Lindstrom, the Commerce Club was launched on its first journey with a crew of forty-one charter members. It is now cruising along at top speed with a present membership of seventy-five commercial students.

The organization was founded to promote social contact and fellowship among the students to create interest in civic and business problems and to give the students the opportunity of hearing men talk who have had actual experience in the field of modern business.

All of the commercial students of Tri-State College are eligible to join this society. In November, 1929, an amendment was made to the constitution making the administrative engineers of the college eligible for membership as they spend three terms of their course in the School of Commerce.

We have as honorary members our college faculty and Dean Lindstrom as our adviser. The officers for the spring term are as follows:

Lohman V. Blue	*President*
Edna M. Lee	*Vice-President*
Catherine Dunn	*Secretary*
Jack Spider	*Treasurer*
Roy Reppard	*Chairman Executive Com.*

Remember the good time at the Commerce Club party at the Phi Delt hall December 12, 1929?

How pretty the hall was decorated with beautiful floor lamps and bridge tables. The orchestra pit was draped with black and white velvet curtains and the orchestra, OH, BOY! Wasn't that too good for words? We just had to dance to that crazy rhythm. No wonder the boys wouldn't speak friendly to Dean Lindstrom after the way he took their girls and danced with them!

Why Prof. Hoke even took dancing lessons so he could make a hit with the girls, and he did, AND HOW!

About ten-thirty, wafers, punch and lolly-pops were served to about fifty couples. Dean Lindstrom thinks that was the best punch ever. It must have had that "come hither" look, for he came back so many times, saying his wife was thirsty, but we know different.

After a wonderful evening of dancing and eating the party adjourned at twelve-five eastern standard time.

And last but not least, our second annual Commerce Club banquet which was held at Potawatomi Inn, Lake James, on May 17th. This was the gala event of the year. Our president, Mr. Blue, acted in capacity of toastmaster, and the following program was arranged by the committee:

Invocation	Prof. Burton Handy
Welcome	Prof. Charles Sherrard
Selections	Miss Margie Golden *Accompanied by* Miss Evelyn Snowberger
Greetings	Dean Walfred Lindstrom
Address	Mr. C. M. Niezer First and Tri-State National Bank, Fort Wayne, Indiana

Music for dancing was furnished by the Ohioans, the well known musical artists of Radio Station WOWO.

The dancing closed the party at 1:00 o'clock, the students voting it the best time they had ever had.

The Aeronautical Club

The Winter Term, of 1930, saw the inauguration of the Aeronautical Club, of Tri-State College of Engineering. The purpose of the Club is to further the interests of aeronautics among the students of the college.

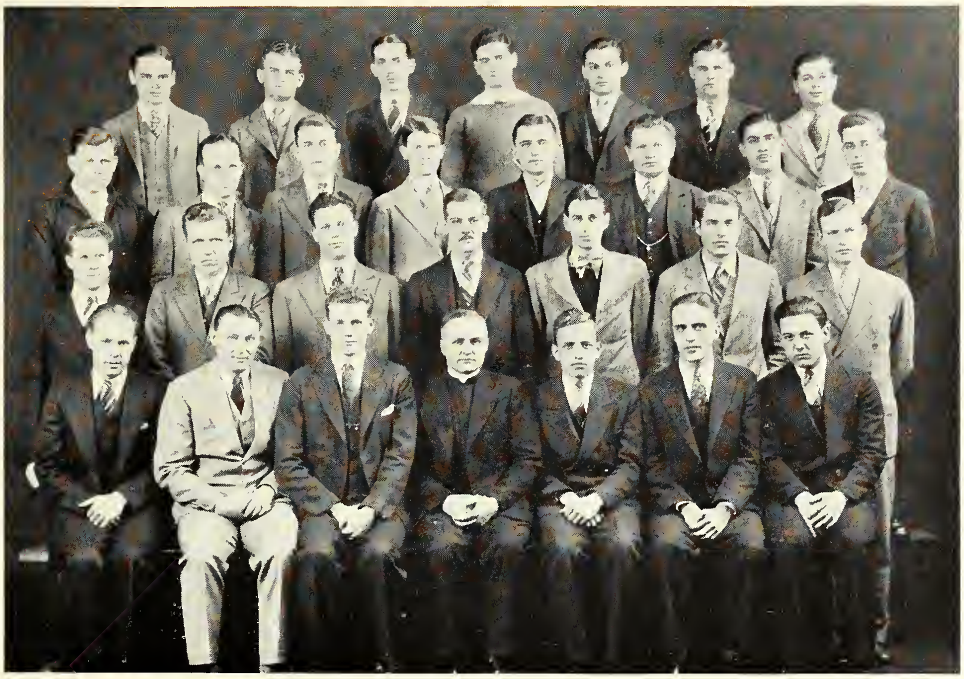
The first meeting was held in January of 1930, at which meeting it was decided to outline a constitution and to select a date for the election of its officers. It was also decided to hold the meetings bi-weekly. Messrs. Dressel and O'Keefe were appointed to draw up a constitution to be presented at the next meeting.

At the next meeting, officers were elected and the modifications of the constitution accepted. The officers elected were:

J. H. Dressel........................*President*
Joseph O'Keefe...... *Vice-President*
J. H. Hatch..........................*Secretary*
Mr. Sites.............................*Treasurer*
R. Clark..........................*Memberships*

Attractive programs, in the way of interesting talks and discussions on aeronautical subjects, are offered to those who attend and much can be learned from these.

The membership of the club is unrestricted and it is hoped that all students new in the College will join our ranks and help to make this new organization one of the most successful ever known on the campus.



First row: S. Ellingham, R. Baltz, E. Doyle, Fr. T. V. Fettig, G. Signarovitz, Prof. C. F. Cronin, A. Triano.
Second row: V. Juerling, A. Skottey, H. Siener, E. Loeser, P. Equi, J. Hellrung, B. Keating.

Fourth row: L. Doberstein, J. Kozma, N. Weber, A. Salaro, G. Zamberano, J. Amstutz, A. Ciprano.

Catholic Collegiate Club

On the night of December 8, 1929, a group of about thirty student members of St. Rita's Catholic Church, together with their pastor, Rt. Rev. Theo. V. Fettig, assembled at the Phi Lambda Tau fraternity rooms. The following officers were elected: Prof. C. F. Cronin, president; R. Baltz, secretary; G. Signarovitz, treasurer; L. Doberstein, lecturer. At the second meeting, Prof. Cronin and Dobestein resigned, E. Doyle was elected president and A. Triano, lecturer. The Club forged ahead very steadily for its first term under the able leadership of President Doyle and the support of its enthusiastic charter members. There were five meetings and a total active membership of 26 in the Club. The second term, the following new officers were elected: G. Signarovitz, president; W. Porter, vice-president; S. Ellingham, secretary; A. Skottey, treasurer; A. Triano, lecturer. The Club soon hopes to be affiliated with the Federation of College Catholic Clubs and will then be called the Newman Club. This is an organization federating Catholic student Clubs in non-Catholic universities and colleges throughout the United States and Canada. The purpose of this organization is to promote and develop the religious, educational and social life of the Catholic student.

First row: G. Door, R. Ficker, J. Shaw, C. Insullander, L. E. Biar, G. V. Jordan, D. Evans.
Second row: B. Rubenstein, B. Lahari, E. Lampman, K. Fortman, H. F. Johnson, P. Mengel, L. Machiorletti.

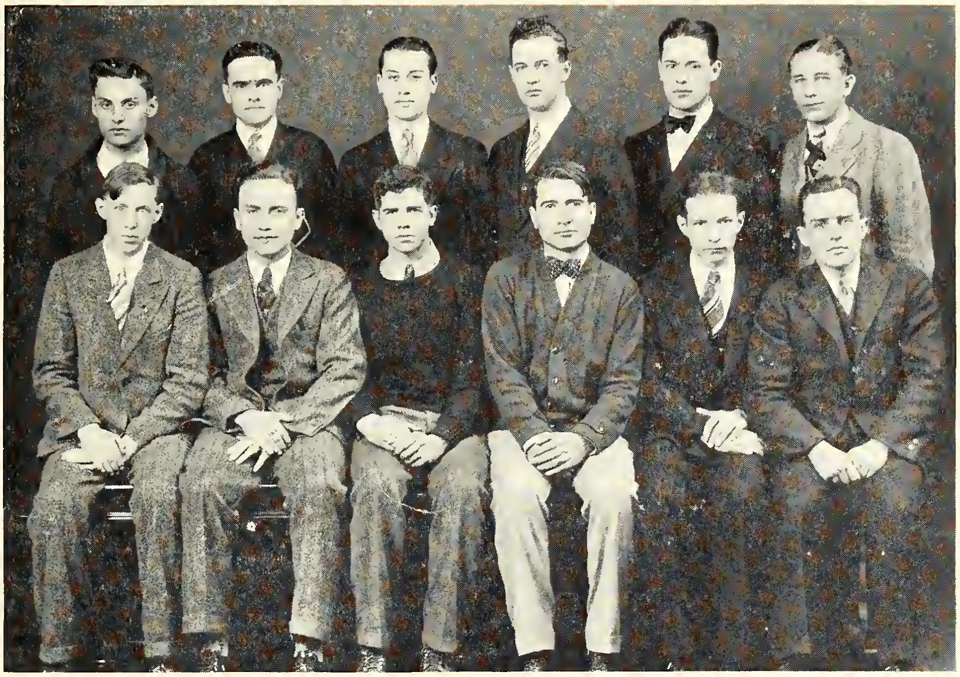
Tri-State Radio Club

A number of students, who had either been amateurs, before coming to college, or had showed interest in amateur radio, met in February, of 1930, with the view of forming a radio club, here at Tri-State. The club was formed and a constitution drawn up. The object of the club is to further goodfellowship and provide means for obtaining further knowledge, in the radio art.

The club has two memberships. The first or senior section has, as its members, those who have been in college for more than one term and who have belonged to the club for one or more terms. The other section consists of the new members, who, after having proved themselves worthy in the learning of the code and the care of station equipment, are elected to the senior grade.

Meetings are held every Wednesday evening and attractive programs are outlined. These programs consist of lectures on the theory and operation of different pieces of radio equipment. At each meeting instruction in code and in the care of station equipment is given. As every amateur hopes, at some time, to have a station of his own, these lectures and instructions are very helpful.

In the near future, the Club, having equipment available, intends to establish an amateur station, which will be under the personal supervision of a licensed operator. This will enable communication with other amateur stations and thus help to further the interests of the Club.



First row: C. Field, T. Sutherland, W. A. Park, J. R. Robertson, D. F. Wade, P. Luce.
Second row: M. Pfifer, R. Clark, E. Loekerson, J. H. Sprigel, W. Webster, A. Olson.

The Forum Club

The Forum Club was organized at the beginning of the Winter Term, in January, 1930.

Under the leadership of Powers Luce it has progressed until at the present time regular meetings are held weekly, in one of the class rooms of the Engineering building, from seven till eight P. M.

The purpose is not to make orators, but to cultivate the art of speech, believing that a convincing and forceful speech exerts a great influence in business, social and public life.

The membership of the Club is at present limited to fifteen. Although it is not an exclusive organization, its charter members believed it would be advisable to limit the membership, so that more attention could be given to each individual, and to allow him time for a short speech at each meeting.

Messrs. Willis, Ott, McClue, Judge Carlin and Professor Hoke have generously given their services at different times to act as critics, and through their constructive criticisms, the student has been able to improve his rhetoric and has learnt that poise and self-confidence are also determining factors in the art of public speaking.

May the Forum continue to be a souree of help and guidance to those who wish to be enlightened in the important art of public intercourse.

Clear the Way

Men of thought! Be up and stirring,
Night and day;
Sow the seed, withdraw the curtain,
Clear the way!
Men of action, aid and cheer them,
As you may!
There's a fount about to stream,
There's a light about to beam,
There's a warmth about to glow,
There's a flower about to blow,
There's midnight blackness changing
Into gray!
Men of thought and men of action,
Clear the way!

Once the welcome light has broken,
Who shall say
What unimagined glories
Of the day?
What the evil that shall perish
In its ray?
Aid it, hopes of honest men;
Aid the dawning tongue and pen:
Aid it paper, aid it, type,
Aid it, for the hour is ripe;
And our earnest must not slacken
Into play.
Men of thought and men of action,
Clear the way!

Lo! a cloud's about to vanish
From the day;
And a brazen wrong to crumble
Into clay.
Lo! the Right's about to conquer,
Clear the way!
With the Right shall many more
Enter, smiling, at the door,
With the giant Wrong shall fall
Many others great and small,
That for ages long have held us
For their prey.
Men of thought and men of action,
Clear the way.

Charles Mackay.

The Faculty Advisers

The success of every institution and organization is dependent upon the cooperation of its staff and subordinates. It is the advice and counsel which the faculty advisors have so gladly given that has made it possible for us to issue this publication. Our instructors are more experienced with the ways of life and they understand our difficulties better than we possibly can. We have found that a little counsel at the proper time is worth its weight in gold.

We feel that we have been very fortunate in having such capable persons as our advisers. Prof. Parrott, who is the head of the English Department and quite an experienced teacher, has offered very valuable assistance in the selection of the literary work for this publication. We have found her ready to assist us with every difficulty which we have encountered. She has really earned the right to be called an adviser.

Prof. Handy, our registrar and treasurer, has had wide experience in literary work and has offered many valuable suggestions about our work. We have found him ready to advise us wisely at all times about the financial and economic factors to be encountered in our publication work. He has not hesitated to present the facts to us in the most lucid manner possible.

Professor Sherrard, president of our college, has had considerable experience as a student adviser and has been in a position to aid us in the best way possible. We have found him ready to offer suggestions at all times, and we believe that he is accomplishing his purpose.

The 1930 Modulus

The Modulus staff of 1930 presents this book for your approval. During the school year the world has celebrated the golden jubilee of light, honoring Thomas A. Edison. The art theme was chosen as our tribute to this great inventor.

We have tried to produce as accurate a record as possible of our last school year. We ask you to consider the short time in which the staff has had to prepare this book when making your criticisms.

The staff appreciates the cooperation of the faculty in their suggestions and general interest shown. Many members of the student body have aided in times of difficulties and each receives his thanks.

This year the school of Commerce is represented on the staff with men of their selection. It was our aim to represent this department satisfactorily.

Thanking our co-workers on the staff and may our happy experiences be memories in the days to come.

The Integral

The Integral is sponsored by the Engineering Society and is published twice each term. It contains articles which have been written by the students of the various departments and is the official mouthpiece of the Society. attempt has been made recently to enlarge this publication by allowing the Commercial School more space for its articles and a larger share in the publication and distribution. It is believed that this step will be successful.

There have been four issues during the fall and winter terms. They have all been very interesting papers and are well worth reviewing.

The first issue was known as the Thanksgiving number. It contained a number of technical articles by practical engineers and one similar article by a local student. An interesting history of Tri-State College written by Professor Handy appeared in this number. President Sherrard extended greetings to the new and old students by a well-written editorial. The fraternities published a large amount of news and expressed the joy with which they entered another term's work. There were many other interesting articles, including a stunt night description, jokes, etc.

The next issue, known as the Christmas number, was much larger than the previous one. It contained a number of articles about electrical and chemical engineering. An interesting story, ''Engineering by Instinct,'' appeared at this time. The fraternities discussed plans of celebrating the Christmas vacation and welcomed more pledges. There was a number of jokes and the minutes of the engineering meetings were published.

The next issue, known as the January number, had a clever cover design which portrayed the new year in a rather gay fashion. An excellent article entitled ''In Appreciation'' appeared. It was written by a senior who lamented the fact that he must depart from his happy abode at Tri-State. A separate editorial page appeared and contained a few excellent editorials. The Commerce School began to make use of their recently granted privileges by writing a number of administrative and commercial articles. The fraternity section welcomed the new sorority, Sigma Alpha Gamma. They also discussed their Christmas vacation. Campus news was published for the first time.

The last issue of the *Integral*, known as the March number, was placed on sale just a few days before the end of the Winter term. It contained a number of Aeronautical and general articles by the engineers and several administrative articles by the commercials. The Engineers' Banquet was described in detail. A number of editorials and news from other campuses appeared. The fraternities as usual were present in full force. The Sigma Alpha Gamma published its first article.

This briefly summarizes the most important points in each issue of the *Integral*. The Engineering Society knows that it is one of its most important auxiliaries and is not hesitating to make every improvement possible.

Haste Not, Rest Not

Without haste! Without rest!
Bind the motto to thy breast;
Bear it with thee as a spell;
Storm or sunshine, guard it well!
Heed not the flowers that round thee bloom,
Bear it onward to the tomb.

Haste not! Let no thoughtless deed
Mar for aye the spirit's speed!
Ponder well and know the right,
Onward, then, with all thy might!
Haste not! Years can ne'er atone
For one reckless action done.

Rest not! Life is sweeping by,
Go and dare before you die
Something mighty and sublime
Leave behind to conquer time!
Glorious 'tis to live for aye,
When these forms have passed away.

Haste not! Rest not! Calmly wait;
Meekly bear the stones of fate!
Duty be thy polar guide—
Do the right whate'er betide!
Haste not! Rest not! Conflicts past,
God shall crown thy work at last.

GOETHE.

Societies

The Engineering Society

FALL TERM—'29

During the summer of '29 activities, as usual, were practically at a lull. The average person finds the temperature considerably too high to take a part in anything except an outdoor gathering. Nevertheless, the officers kept the organization intact and capable of advancing when temperature, time, and other elements became ripe. At the end of that term officers were elected and plans were begun for a complete rejuvenation of the Society during the fall term.

Some of the officers who had been elected for the fall of '29 did not return to school so temporary appointments were made in several cases. Under this handicap President Ave guided the organization exceptionally well. The age-old question of severing all connections with the Western Society of Engineers of Chicago, Ill., was brought up before the house again. Several heated arguments and debates followed this discussion, but it eventually led to the inevitable result, that the question was carried and all affiliations with the Western Society were ceased.

The Society did not blindly vote to detach itself from its mother organization, but it did so in the face of facts and evidence that conclusively proved this action to be the last recourse. This question was one of the most outstanding issues of the fall term, not only in itself, but in the consequences to which it led.

Due to the fact that the provisions of the Western Society had been so thoroughly imbedded in the constitution of the local organization it became necessary to make a revision of the articles so affected. Under the capable direction of Minard Rose the constitution committee revised all sections of the constitution in a very thorough manner. The new provisions were readily accepted by the Society and it is sure to fit the needs of the present organizatoin more fully than before. Certain phrases that will place the MODULUS and *Integral* on a firmer basis and make them not only publications of the Engineering Society but of the entire college group have been added. This is a summary of the most outstanding administrative questions that had to be coped with during the fall term.

Meanwhile social activities were not at a lull. Plans were begun early in the term for the largest and best Stunt Nite Affair ever produced. Several questions had to be settled, but plans were dispatched in a thorough manner as could be expected. Each of the departments prepared floats and other regalia for the affair. Many new designs were to be found among the various displays. A detailed description of the parade may be found elsewhere in this publication. The show was under the direction of Charles Shank, who surely succeeded in his attempt to revive the Tri-State Comedy Club by this production. The most outstanding feature was an operetta by Gilbert and Sullivan.

The matter of weekly entertainment was not neglected. Interesting films of gigantic engineering developments were shown at various intervals and good speakers were presented occasionally to add to the educational value of the meeting. The knowledge of the experience of others that can be gained through entertainment certainly had a marked effect upon our attitude toward our subjects in the classroom.

There was quite an interest aroused when the election of officers was mentioned, because it seemed that the Society should have the best administration possible during the first term of its new life. Several of the candidates supported a number of issues, which if carried out would mean a higher standard of social environment and result in the formation of a new club and societies about our camps. Charles Deichmann, one of our advocates of these policies, was elected president, and a capable body of assistant officers was elected to aid him.

The Engineering Society of Tri-State College

Fall 1929

P.M. FLORENDO
Philippines

WINTER TERM—'30

Under the leadership of Charles Diehmann the organization began work at once to accomplish the aims and purposes which had been set during the campaign for election. It soon became evident that the Engineering Society was probably expending more effort to promote the extra-curricular activities of the students of Tri-State College than any other society or club in the engineering school. With a thorough revision of its constitution an entirely new program had been adopted.

An outstanding endeavor was the founding of an honorary fraternity. There has been much discussion about this matter and it seems that the chapter is sure to be functioning soon.

A radio club has been organized. There are several members and a number of interesting meetings have been held. This organization should become one of the school's foremost technical and educational societies.

The introduction of a course in Aeronautical Engineering has brought many students interested in aviation to the campus of Tri-State College. This has made necessary the organization of an aeronautical club. The Engineering Society helps to sponsor this development and hopes to see it grow as the course develops.

During this term, through able direction of its vice-president, the Engineering Society presented many prominent technical lectures and interesting films. The Society believes that we can profit by the experiences of others and is trying to teach us the experiences encountered in the field by bringing good speakers to the college.

The *Integral* received more enthusiastic support than ever before. The editor produced a magazine which was really a credit to the school. Many new sections were added to the paper. The Commercial department contributed several articles and helped to make the *Integral* one of the best college papers.

This term also saw the MODULUS staff begin its work. Various printing matters and general layout of the work was developed.

The Society again sponsored the annual Washington banquet, which is held on Washington's birthday. The entire school co-operated to increase the sale of tickets and promote the general atmosphere of the banquet. Over three hundred persons were present to celebrate this annual homecoming. Many of these persons were alumni who are holding responsible positions in the fields of science, engineering, commerce, and art. A detailed description of this affair may be found elsewhere in this book.

During this term the Society realized the majority of its dreams. It saw its membership grow to the standard set by the leaders and it saw a hearty cooperation on the part of most of the members toward carrying out projects which might be undertaken. The merits of the constitution were tested thoroughly and it seemed to stand the gaff as well as could be expected.

This summarizes the major steps taken by the Society during this term. It has been necessary to be brief in many cases owing to the lack of space, but it is hoped that no particular affair has been overshadowed to any great extent.

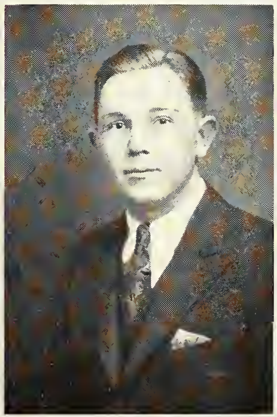
A. E. Olsen
EXECUTIVE COMMITTEE



J. A. Brooks
REC. SECRETARY

SPRING TERM—'30

When warm days come everybody becomes interested in outdoor programs and entertainment. Nevertheless, it is not proper to become so engrossed in these pleasures that lessons and other studies are forgotten. It is quite a problem to decide the proper course which should be taken toward accomplishing the best results during this period.

This serious question must be settled by the leading society of the school and, consequently, by the Engineering Society at Tri-State College. Some program must be devised by which the students may obtain the proper amount of recreation and entertainment without serious interference to school work. Many attempts have been made to solve this problem, but nothing very remarkable has been accomplished; therefore, the responsibility of another attempt will rest upon the shoulders of the present officers.

Wilfred Park, who has had quite a bit of experience with the work of the Society, has been elected president. He served very capably as the vice-president of the organization during the winter term and succeeded in bringing more entertainment and better programs before the Society than has been produced for some time. A number of meetings have already been held and there is every indication that those plans which possibly were not completed during the winter may now be brought to a satisfactory conclusion.

The meetings are conducted under Roberts' Rules of Order. Every member is given the freedom to voice his opinion and a general spirit of democracy prevails throughout the assembly. An excellent training in public speaking may be obtained by any person who will take an active part in the organization by voicing his views before the assembly. This knowledge and experience may prove very useful and may save many embarrassing moments during later life.

The organization is sponsoring a slide rule class this term. It has been a practice to introduce this instruction during the fall and spring terms. Prof. Pfeifer, who is quite a slide-rule expert, is the instructor. The new vector rule is being introduced and additional phases are being added to the course to cover this work. The ordinary slide rule is quite a weapon for any engineer, but the new rule should prove to be much more comprehensive and useful to the profession.

Those who are studying electrical engineering will find that the simplification of vector analysis, accomplished by the rule, will be well worth the few minutes spent in the study of its use. No tuition fee is assessed for the instruction. The possession of a slide rule is the only requirement.

There will be several class functions this term and it will be the business of the Engineering Society to aid the various classes in the preparation for these affairs. It usually results that those who take an active part in the Society will also use their best influences for the promotion of their respective classes.

It has not been possible to relate exactly what the Society has done this term, because this publication is being sent to the press before the major activities are launched. Some of the activities that mean so much to the welfare of the members have been discussed and judged. Nevertheless, it is beyond us to evaluate the benefits of the Society, because their true worth depends upon how well the particular member utilizes them.

This article completes the summary of the activities throughout the entire year. It is hoped that the spirit and meaning of the Society have been clearly portrayed. We believe that this organization is really an integral part of the college, and for that reason we support it as best we can.

The Chi Epsilon Society was founded for the promotion of chemistry and fellowship among the Chemical Engineering students at Tri-State.

The Society has sponsored speakers of such calibre as Mr. F. H. Marsh, of Chicago, renown as an authority on synthetic gems, Dr. C. C. Sherrard, President of the College and many other speakers noted for their work in the chemical field.

At each meeting talks are given by students who have had experience in various commercial laboratories throughout the country. During the term each member is called upon to present a paper on some subject that he has been conducting experiments with. The men take a deep interest in anything in the chemical field and have developed many interesting pieces of research.

ΣH
★★★
TRI STATE
COLLEGE

For many years the college has lacked means of awarding honors to individual students who have attained a high scholastic standing and distinction on the campus. It was finally decided by popular vote of the Engineering Society in December, 1929, to sponsor the establishment of an Honorary Society. In January, 1930 the plans were made and the work had begun. The committee in charge of the organization continued successfully with its work and on April 10, 1930, was granted a charter by the State of Indiana, as a local collegiate Honorary Society.

A student receiving unusually high grades in his academic work and approved by the faculty advisors, may be awarded a membership in the society. The student may achieve membership by his distinguishing himself through one of the campus activities, such as, being outstanding on one of the publications, Engineering Society, etc.

Its chief ambition is to become affiliated with some collegiate honorary.

Dramatic Club

Through the efforts of a small group of students, who are intensely interested in drama and dramatic productions, the Tri-State Dramatic Club was formed. This organization is the newest on the campus and is destined to be one of the most popular.

For years there was no organization on the campus that appealed to the student with dramatic ability, and to fill this need it was thought that an organization, somewhat similar to the old comedy club, would be acceptable to the student body. When it was announced that such a club was in the process of formation, the student body, as well as the faculty, became very much interested and consequently the success of the dramatic club was assured.

This organization in its meetings, studies and discusses the latest popular stage plays, and in addition, the methods of production, stage construction, lighting systems and play management are discussed. Because of its broad study in the dramatic field, not only actors and actresses are eligible for membership, but also those who are interested in the other branches or the technical side of the dramatic production.

The Dramatic Club is well represented in the 1930 senior class play, the majority of the cast being members. This year the senior class is presenting an unusually good play, entitled, "The Three Wise Fools." It is a play that met with phenomenal success in its long run on Broadway, and is always an attraction when used as an amateur production. It is the first play to be given in the newly remodeled school auditorium, and it has every indication of being a real success.

Campus Life

Stunt Nite '29

The Engineering Society sponsors annually a Stunt Nite Parade and Show which last year was held on November 1. This Hallowe'en celebration is regarded as a regular event. Students and townspeople look forward to the annual parade and program staged by the boys in the various departments of the school.

The parade was headed by the Angola fire truck and directed by Marshall Paul Burgett, mounted. It formed on South College Street and advanced to West Maumee Street and east through the business section of the city.

The several departments of the school were represented in full regalia. One of the most outstanding features was the Aeronautical display, which consisted of a neatly arranged aeroplane mounted on a truck.

The Electricals had a very unique arrangement in the form of a miniature duplicate of a radio broadcasting station. The apparatus had been arranged somewhat in the form of a public address system, but there was little success in the operation because other noises were so intense.

The Civils were represented by a bridge model mounted on a truck, while the Chemicals, as usual, presented an interesting array of fireworks and chemical phenomena to make the parade a flashy production. The Mechanicals also had a clever design.

The Commercial and Administrative Departments were represented by a cleverly decorated truck beset with a number of fair young ladies from our campus.

Several of the fraternities contributed excellent floats to represent the college in true environments, both social and educational.

These parades and exhibits are very important, because they reveal to the community the true spirit of the college and the students. They show what the school is trying to do and what it has done. They are the criterion of others' judgment.

After the parade made its sojourn through the thoroughfares of Angola, the majority of the bystanders repaired to Chapel Hall to witness one of the best stage productions that has visited Angola for some time.

Much time and effort had been spent in the development and outlay of the program. It was to mark the revival of the Tri-State Comedy Club which had flourished so brilliantly in other years. The following persons formed the Show Committee:

Wm. J. Powell	*Chairman*
Hal Conners	*Business Manager*
Al. V. Rubel	*Business Manager*
F. Venzara	*Stage Scenery*
Minard Rose	*Stage Scenery*
Frank Brooks	*Stage Scenery*
Peter Gwin	*Lights*
L. Thompson	*Properties*
Harold Curtis	*Properties*
Al. V. Rubel	*Program Arrangement*
Mrs. Emmet Shank	*Costumes*

These persons deserve due credit for the effort which they expended to accomplish such splendid results.

The complete program arrangement and a list of the cast may be found on another page. We hope that no act or character has been slighted and that all have been given due credit.

Stunt Nite Show

The Stunt Night Show under the direction of Charles Shank proved to be a grand success. The performance was held in Chapel Hall. The program consisted of the following acts:

Act 1.—Campusitis. Songs—College Song, Lament of Disgust, Pay Attention Prof.
Act 2.—Music in the Air. Songs—Sweet Child, Rolling Down the Rio, Good Morning Mr. Sunshine.
Act 3.—The camel and the vampire. An Oriental Pantomine. Scene—The Persian Desert. Time—The Dim and Distant Past.
Act 4.—Jimmy on Hallowe'en. June Gordon and Pajama Girls.
Act 5.—Farewell from 1849-1929. 1—1849; 2—1899; 3—1919; 4—1929.
Act 6.—Creatures of Impulse. Scene—Courtyard of the Three Pigeons Inn. Time—Medieval Ages in Alsace-Lorraine. Choruses of Bar Maids and Pirates. Musical numbers—Where's the Bar Maid?, Gentlemen of the Highway, The King's Bodyguard, Old Jerry Bones.

FINALE

The shortest comedy deserves a word of praise because it was well produced and very entertaining. It can truthfully be said that this good, clean production was beneficial to all of the students and faculty, both actors and spectators, and we hope that the example set will be followed through coming years.

CAST

Sergeant Klooque	Hal Conners
Boomblehardt, a miser	Pete Equi
Peter, a young farmer	Wm. J. Powell
Martha, landlady of Three Pigeons	Patsy D'Ambrosio
Pipette, her niece	Al. V. Rubei
Strange Old Lady	Charles Deichmann
Maid	Frank Moore
Pirate Chief	Henry Wadsworth
Jerry Bones	George Henderson

CHORUS

Bar Maids—Frank Moore, F. Noel Hopper, Wm. Roberts, Joe Moyer, Ed. Colwell, Walter Bischoff, Keith Dubey.

Pirates—Earl Losier, Norman Pidgeon, Burton Handy, Jr., Frank Pauley, George Holton, Edward Moore.

Others—Lois Golden, Minard Rose, Malinda Shank, Bartlett Meager, Grover and Arthur Cleveland, Arthur Kelly, George Holton, Louis Doberstein, Erick Erickson, John Magill, Mathews, Turkelson, Collier, Mattocks, Pidgeon, Leora Van Aman, Hendrickson.

The Engineers' Banquet 1930

It has been the custom of the Engineering Society to stage a banquet each year in honor of the alumni, faculty and students of Tri-State College. This event is usually held on Washington's birthday and is attended by large groups of the many alumni, whom this college has produced.

This year's banquet was as successful as it had ever been before. According to tradition Prof. Bill Pfeifer was the toastmaster. He served at his post as capably as ever, although, as those present recall, Prof. Lindstrom finally succeeded in getting his goat.

Charles Deichmann, president of the Engineering Society, welcomed all of the former graduates to the festival and wished them a happy evening. After Vic Townsend, with Howard Todd at the piano, had charmed the audience with a few selected vocal numbers, Doctor Sherrard completed the job of assuring the alumni that everybody was glad to see them again.

Prof. Lindstrom, the speaker of the evening, proceeded to speak on the value of Spiritual Dynamics, those inward forces of man which has lead him to outward manifestations. He mentioned man's rudimentary knowledge of these forces and his experience in putting them to service.

First—Growth or a consciousness of increased intellectual power. For a baby to be stunted in bodily growth is no greater a tragedy than for a man to fail to grow in his conception of the universe and his own particular field of labor.

Second—Self expression or the transfer of the instinct of play from childhood over into the activities of manhood. The Game of Life is the greatest game of all.

Third—Creation, for man is essentially a creator. A man is not complete who does not experience a consciousness of creative power, a conviction that he is a master of at least one art, that he is equal to any in his own particular field.

In conclusion Prof. Lindstrom offered these ideas of Spiritual Dynamics—Growth, Self-Expression and Creation to the students, both old and new, and urged them to make of themselves not only outstanding engineers but real men.

At this banquet the visiting alumni were also given an opportunity to express themselves. The toastmaster called upon them to tell of their work and experiences since graduation and many had interesting stories to relate.

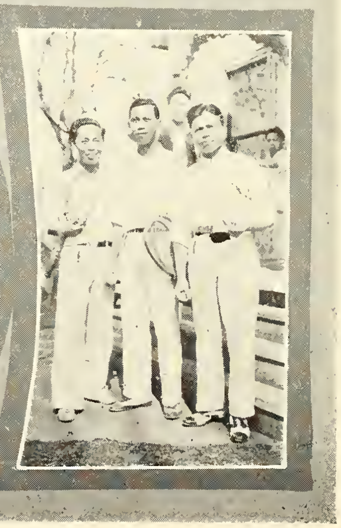
The rolling green of our old Alma Mater—The beauty of nature that is always present in its fullest splendor—Just another view of our administration building with some of the memorials left by others—These fountains and other memorials mark the graduation of every class and together with the natural beauty of the campus bring back to us fond memories long after our scholastic days are over.

The sun god breaks upon the splendor of a Northern Indiana lake—Through the leaved and unleaved, we see the crystal waters—These parks and lakes which nature has bestowed upon this region make a "Campus" that cannot be excelled for beauty and splendor—It is the haven for beauty lovers from all over the country.

Swimming — Boating — Tennis — Just a few of the outdoor sports enjoyed at Tri-State. The seasons make little difference in the participation in any of them.



It takes the fraternity, the fellow, and the student to make the college life complete. We are proud to have them all. Our engineers are always men in business or in fun. They smile and stand as pals.

Poses—Oh yes, that is what these are—If this were something along technical lines, the results might be different.

Ditch diggers, pencil pushers, typewriter pushers, boilermakers, and wire twisters. Here they are on duty and off . . . mostly the latter.

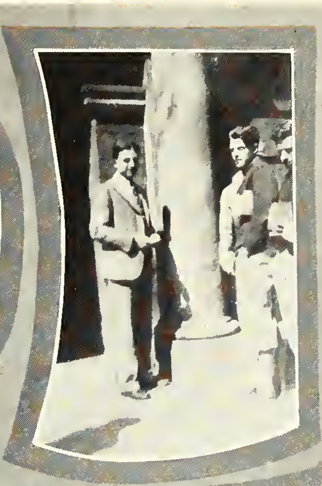
These are some more of our regular fellows and fraternity brothers—United they stand and divided they might fall—They get their lessons, play their games, and love their women.

You will find many forms of diversion and recreation in our study with a will divine. . . . Others like to sigh and pine . . . While others love to play and joke . . . But . . . They all enjoy sleep.

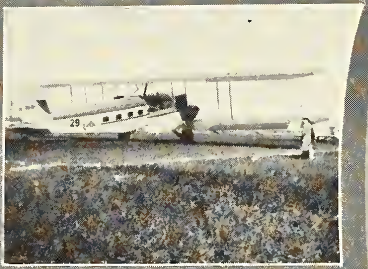
The fair lady proposes to the strong man to introduce this page. We then review our captains of commerce and industry in various garbs of childhood and youth . . . But as one picture may suggest, "We are on the wagon and on our way," . . . to make a name for ourselves and our alma mater.

Herein we have tried to portray the splendor or our fair sex . . . the jewels of our campus. They glorify and beautify the natural setting of our community, and make our college life acquire that certain quality which makes it complete. They are here for business, and mean to give the strener sex keen competition in the affairs of the world.

By meeting our professors, you realize the personal interest which they are willing to give every student. They are real friends and know their "stuff." We are proud of them and have tried to co-operate with them to obtain the best instruction.



Our instructors are so closely associated with the students that it is practically impossible to obtain separate snapshots of them. The value of this personal contact is readily realized from the record of Tri-State graduates. These men do come to class as a matter of form but to teach.



The course in Aeronautical Engineering has brought many persons interested in aviation to our campus and is fast becoming a major department.

The current discussion and the accompanying roar of airplane engines, make us realize that Tri-State has become "Air Minded."

NO
PARKING
IN THIS
ALLEY

Not all our spare moments are spent in study. Auto rides, bathing, picnics and blonds furnish us with pastimes that make us enjoy our days at T. S. C.

The Girdle of Friendship

She gathered at her slender waist
The beauteous robe she wore;
Its folds a golden belt embraced,
One rose-hued gem it bore.

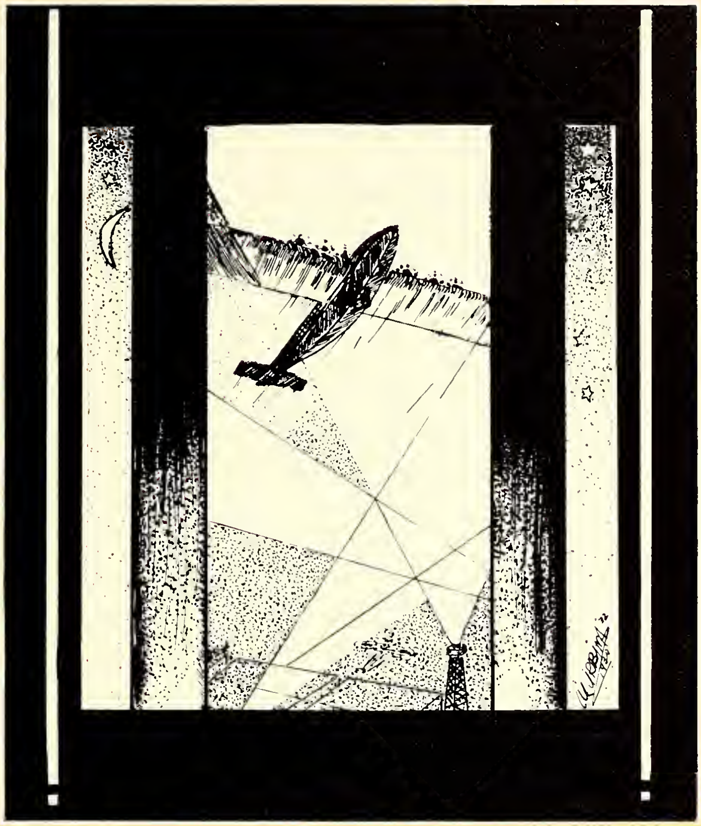
The girdle shrank; its lessening round
Still kept the shining gem,
But now her flowing locks it bound,
A lustrous diadem.

A narrower still the circlet grew;
Behold! a glittering band,
Its roseate diamond set anew,
Her neck's white column spanned.

Suns rise and set; the straining clasp
The shortened links resist,
Yet flashes in a bracelet's grasp
The diamond, on her wrist.

At length, the round of changes past
The thieving years could bring,
The jewel, glittering to the last,
Still sparkles in a ring.

So, link by link, our friendships part,
So loosen, break, and fall,
A narrowing zone; the loving heart
Lives changeless through them all.



ADVERTISEMENTS

An Appreciation

The production of a year book is not financially practical without the assistance of the advertisers.

The Modulus takes this opportunity to thank the individuals and firms, whose names appear in the following pages, for their co-operation.

Their products and services are commended to the attention of our readers.

AT THE FOOT OF THE CAMPUS

A GENTLEMAN

There's a gentleman in our school
Whose name we often see—
Pinned up on boards and pamphlets
On the school's directory.
He's tall and gaunt, but kindly, too—
With a manner not to freeze,
And his favorite expression
Is, "Fifty dollars, please."

He's the first man that we meet
When we enter the old school,
He sits behind a square top desk,
Swinging a three-foot rule.
He gets the students started right
And it's not by planting trees,
'Cause his favorite expression
Is, "Fifty dollars, please."

Sometimes when one comes late to school
He rouses with a snore,
And speaks with rising dignity,
" 'Twill cost you dollars more."
However he's a gentleman,
But not the kind to tease;
And his favorite expression
Is, "Fifty dollars, please.'

ALL OF THEM

Yesterday I walked through the City of the Dead.
The grass was well cut,
Plants and bushes well trimmed over the graves,
But here and there a plot stood out unkept,
A weed patch on which were tangled dead leaves.
I asked the caretaker, "Why?"
And he: "No one pays for their upkeep."
Today I walked through the City of the Dead.
And all of the graves wore a white mantle—
All of them—*Rosa Zagnoni Marinoni.*

PETTY PETTING

Mother—How long did that young man stay last night?
Daughter—Oh, ma, don't bother me with petty matters.

"Do you keep powder here?" asked the young lady from the city at the village store.

"Yes, madam," said the storekeeper. "Washing, baking, custard, headache, rat, face, tooth, teething, insect and gun!"

THANK HEAVEN!

The bad man made the winds to blow
The ladies' skirts so high;
But the good Lord made the dust just
To fill the bad man's eye.

Then there is the ambitious young man who started on a shoestring and got slapped.

"What was the biggest thing you ever had in your mouth?"
"A Camel, of course, silly."—*Pelican.*

He: Oh! That's my foot; please get off.
Strap Hanger: Why don't you put your foot where it belongs?
He: Don't tempt me, madam.—*Judge.*

"Let us," said the alderman, "put our heads together and make a concrete road."

"Did you watch stop when you dropped it on the floor?"
"Sure, you didn't expect it to go through the floor!"

Making love is like making pie. All you need is a lot of crust and some applesauce.

"You certainly are a bad case."
"You flatter me by eleven bottles."

Potawatomi Inn—Pokagon State Park

On State Road 27 5 Miles North of Angola

An Ideal Place For Your Week-End Party

OPEN SUMMER AND WINTER

Potawatomi Inn is a modern structure of stucco, electric lighted and steam heated. There are huge fire-places that add both to the comfort and beauty of the lounge and assembly rooms.

We are at your service at any time for banquets, dinners, dances, bridge and week-end parties, featuring Fish, Game, Steak and Chicken Dinners.

WERNER JANKIN, *Manager.*

Cheer up!
You have two chances,
One is getting the germ
And one is not.

And if you get the germ
You have two chances,
One of getting the disease
And one of not.

And if you get the disease
You have two chances,
One of dying
And one of not.

And if you die,—
Well—you still have two chances.

For that tired feeling—sit down.

"ONCE A CUSTOMER, ALWAYS A CUSTOMER"

Life, like the ocean, rumbles and tumbles,
Encaved by its ramparts of earthly sod.
For life is wantonly, and corruptible,
Influenced, and impeded by the puissance of God.

Salt your food with humor, pepper it with wit, and sprinkle over it the charm of fellowship. Never poison it with the cares of life.—*Anthony Wows.*

Let us be thankful for the fools,
But for them the rest of us could not succeed.—*Mark Twain.*

"Some people are passionately fond of poetry,
Others are fond of passionate poetry,
And still others are poetically fond of passion."
